

Homework-04-02

Steve Simon

This file was created on 2021-01-23 and last modified on 2021-01-23.

Use the cigarettes table in the melange database. Find and print all of the records for cigarettes that have an ampersand (&) in their name.

```
library(sqldf)
```

```
## Loading required package: gsubfn
```

```
## Loading required package: proto
```

```
## Loading required package: RSQLite
```

```
db <- dbConnect(SQLite(),  
  dbname="../data/melange.sqlite")  
ampersand_data <- dbGetQuery(conn=db,  
  "select *  
    from cigarettes  
    where brand_name like '%&%'")  
ampersand_data
```

```
##      brand_name tar_content_mg nicotine_content_mg weight_g  
## 1 Benson&Hedges      16.0           1.06    1.0938  
## 2           L&M      14.9           1.02    0.8858  
##      carbon_monoxide_content_mg  
## 1              16.6  
## 2              15.4
```

```
dbDisconnect(conn=db)
```
